

# Your Listing.

Boost is a cutting-edge digital marketing tool I use to create and runs ads for your property online, maximizing exposure.

## Smarter, Wider, Faster

Immediately after your listing goes live your ad will launch, getting your home in front of thousands of potential buyers almost instantly.

## How It Works

Ads are seen on a variety of social platforms and websites. Boost dynamically places your ad where your target audience spends time online – so each campaign's site list varies depending on the target lists online behavior.

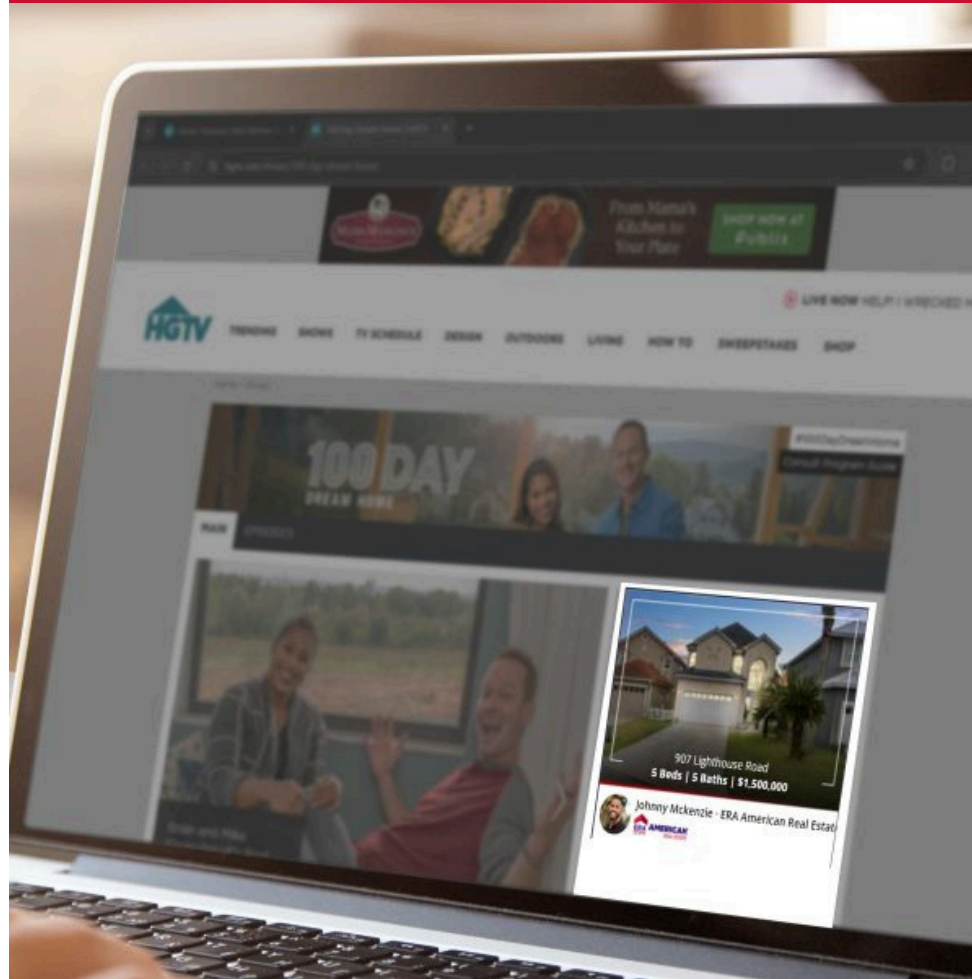

Viewers are sent to a branded landing page with your home's details, photos, and my direct contact information, ensuring no leads are lost.

## Performance Reporting

At the conclusion of the ad campaign, you'll receive a report showing how many people viewed and engaged with your ad.

# Seen Everywhere.
